HSWM12 High-Security Wall Mount

DESCRIPTION

The HSWM12 Wall Mount is designed for use with the HS4012 High-Security Enclosure. The mount features tamper-resistant hardware and manually adjustable pan/tilt positioning. The wall mount is fabricated from 10-gauge steel and will support loads up to 40 pounds (18 kg).

INSTALLATION

To install the HSWM12 mount, perform the following steps (refer to Figure 1):

1. Determine the mounting location. The mounting surface should be able to support four times the combined weight of the mount, enclosure, and camera.
2. Use the flanged end of the HSWM12 as a template and mark the four fastener hole positions on the mounting surface. Set the HSWM12 mount to the side and prepare the holes for the fasteners.
3. Position the HSWM12 mount over the mounting holes. Secure with a minimum of four 3/8-inch fasteners (not supplied). If you install the HSWM12 outdoors, seal the fastener holes with an appropriate sealant to prevent water damage. Apply the sealant between the mount and the mounting surface.
4. Attach the enclosure or camera with the two 1/4-20 tamper-resistant screws (supplied).
5. Loosen the tamper-resistant bolts on the top and lower brackets. Adjust the pan and tilt to the desired settings. Tighten bolts and lock into place.
